

Pro-Stage Modular Staging System

Introduction

Versatile, Strong and Lightweight the stage system is designed to meet your performance needs and budget.

The System comprises of a stage platform and stage riser, the stage riser folds up into a compact unit that is easy to transport.

Internal locks provide a positive locking ensure that platforms are securely fixed and safe for use.

The stage risers are available in various heights and the platforms are available in various sizes (see overleaf).

Specification

A special internal locking device allows the user to secure several platforms together with the use of a 5mm Allen key.

Stage Platforms are secured to the stage riser by use of the same Allen key to lock the corners.

Risers can be stacked on top of each other by use of the connecting screws (model: RK-Screw). This allows the user to purchase a 60cm riser and 40cm riser to give an overall height of 100cm and use only one Platform.

The stage system can be put together in numerous configurations using the components available.

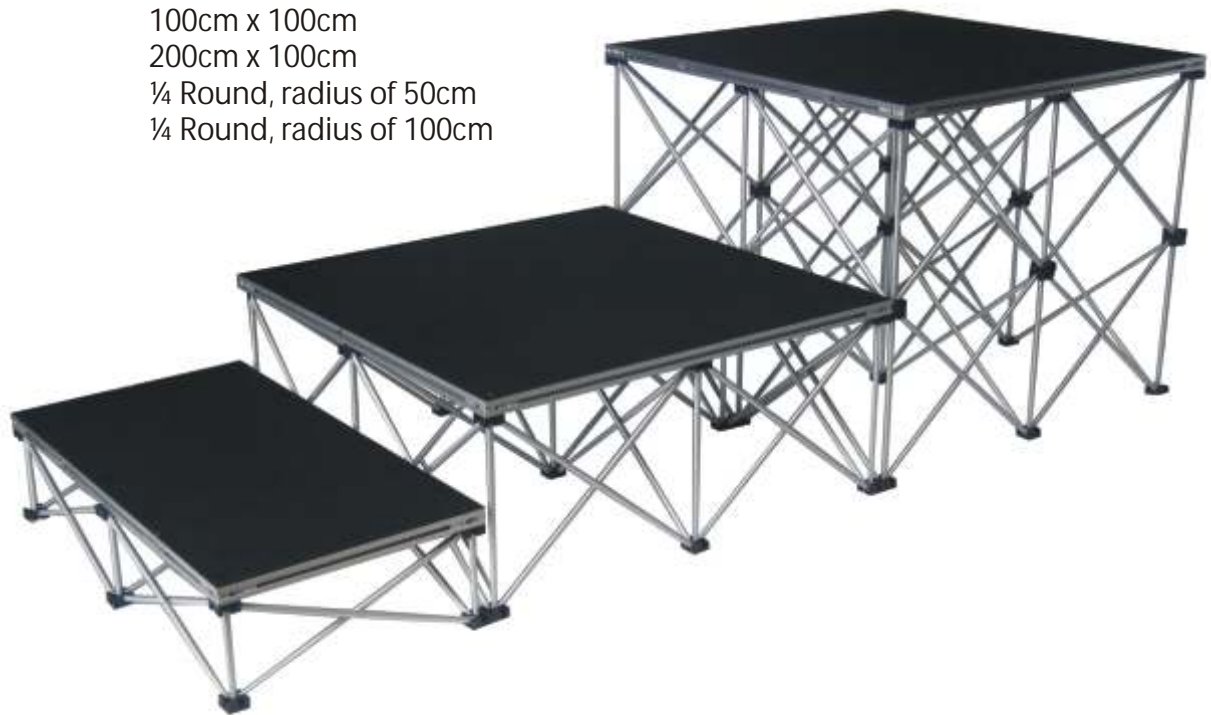

The system can bear 1 ton loading per square metre.

Dimensions

Standard height of Riser: 20cm,30cm,40cm and 60cm.

Stage platforms:
100cm x 50cm
200cm x 50cm
100cm x 100cm
200cm x 100cm
¼ Round, radius of 50cm
¼ Round, radius of 100cm

Flightcases/Packages

The stage system is available with flightcases to provide ease of movement. The flightcases are available in the following models:-

PG4x0.5/40 Flight case for 4pcs RK100-50 platforms and 4pcs risers in various heights

PG8x0.5/40 Flight case for 8pcs RK100-50 platforms and 8pcs risers in various heights

PG4x1/40 Flight case for 4pcs RK100-100 platforms and 4pcs risers in various heights

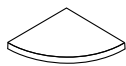

PG8x1/40 Flight case for 8pcs RK100-100 platforms and 8pcs risers in various heights

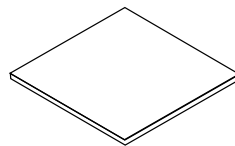

Ideal for Schools, Colleges, Pubs & Bars, Concerts & Drama Performances, and much more...
